TECHNICALSPECIFICATIONS

The iNetVu® 1200 Drive-Away Antenna is a 1.2 m auto-acquire satellite antenna system which can be mounted on the roof of a vehicle for Broadband Internet Access over any configured satellite. The system works seamlessly with the iNetVu ${ }^{\oplus} 7000 \mathrm{C}$ Controller providing fast satellite acquisition within minutes, anytime anywhere.

## Application Versatility

If you operate in Ku-band, the 1200 system is easily configured to provide instant access to satellite communications for any application that requires reliable and/or remote connectivity in a rugged environment. Ideally suited for industries such as Oil \& Gas Exploration, Military Communications, Disaster Management, SNG, Emergency Communications Backup, Cellular Backhaul and many others.

*The shipping weights/dims can vary for particular shipments depending on actual system configuration, quantity, packaging materials and special requirements

## Notes:

${ }^{(1)}$ Antenna based on Prodelin, Model 1132 / 1134
${ }^{(2)}$ Adjustable at the time of order to support higher elevation angle (Optional)
${ }^{(3)}$ Depending on size and weight for feed arm mounting limitation
${ }^{(4)}$ LNB PLL Type required with stability better than $\pm 25 \mathrm{KHz}$
${ }^{(5)}$ Lower stow height option available (approx 4 cm lower)
