## Introduction

IT-ES608-IM is a type of WEB managed redundant Industrial Ethernet Switch, which support 8 10/100M Ethernet ports (RJ45), double power supply input and 1 route repay output. It supports SW-Ring™ patented technology (self-recovery time <20ms) to enhance the reliability of the network. What's more, IT-ES608-IM

supports several network managements, such as 802.1QVLAN, QoS, IGMP, port trunking and port mirroring. It has got the certification of CE, FCC and Industrial level 4 standard. It can meet the requirement of each type of industrial environment with the temperature range of -40 to 75°C.
