

# Make Driving Safer

**ThermalTronix TT-VIEX-A IMAGING DRIVING ASSISTANCE SYSTEM**

## *DALI OWN SAFETY AND RELIABLE DETECTOR*

Military class,  
Well Perform in all range, steadily output image  
Uncooled Micro-bolometer,  
Competitive price.

## *POWERFUL FUNCTIONS*

Detect objects in total darkness, dust and smoke, anti-glare  
Automatically detect person and trigger alarm  
Automatically detect vehicle and trigger alarm  
Automatically clear frost

## *EASY INSTALLATION*

Special connector for car, convenient installation,  
simple and modular design, easy to repair

## *STABILIZED AND SHARP IMAGE*

384×288 Pixels,  
Full real-time display,  
Anti-Shake technology, image keeps stability on rough road,  
Wide field of view(24° X18° ).

Night

Glare environment

Fog and haze

Installation

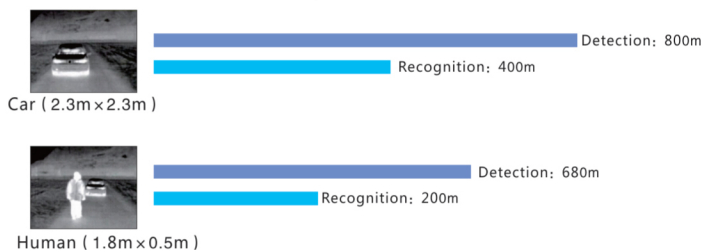

Interface

**Range Performance :**

performance depending on meteorological conditions

**Parameter**

Item	TT-VIEX-A
Detector type	Uncooled FPA microbolometer
Array size	384x288
Field of view	24° x18°
Spatial resolutions	1.3mrad
Thermal sensitivity	≤0.08°C@30°C
Frame rate	50Hz
Lens	No thermal effect of lens, avoid focusing (fixed length)
Automatic heater	When the window temperature below 4 °C, then automatic heating window
Automatic deicing	At -30 °C /100Km/h wind speed, heating 15min 2mm removal of thick ice
Image processing	Automatic, anti vibration track processing
External power supply	12V DC
consumption ;	≤5W
Pedestrian recognition	Automatic pedestrian recognition function
Alarm function	Full automatic pedestrian recognition alarm function, automatic vehicle approaching alarm function
Weight	<400g(Without external cable)
Dimension	70x67x76mm ( Without mounting frame )
